## **QUORUM, VOTING RIGHTS AND OTHER MATTERS**

The Company presently has one class of capital stock, common stock, \$.001 par value, of which 5,096,706 shares were issued and outstanding at the close of business on May 31, 2022. Only shareholders of record at the close of business on May 31, 2022, will be entitled to notice of and to vote at the meeting. The presence at the meeting in person or by proxy of a majority of the shares entitled to a vote shall constitute a quorum for the transaction of business. All voting is non-cumulative.

The Directors know of no other matters, which are likely to be brought before the Meeting other than those listed on the proxy. If any other matters properly come before the Meeting, however, the person named in the enclosed proxy, or that person's duly constituted substitute acting at the Meeting, will be authorized to vote or otherwise act thereon in accordance with such matters. If the enclosed proxy is properly executed and returned prior to voting at the Meeting, the shares represented thereby will be voted in accordance with the instructions marked thereon. In the absence of instructions, executed proxies will be voted "FOR" the items listed in the Notice. The Directors recommend a vote "**FOR**" each of the proposals. Directors are elected by a plurality of the common stock represented at the meeting.

In accordance with Utah State law, certain corporate actions, generally, may create shareholder's rights of dissent and entitlement to payment of the fair market value of shares held. However, none of the proposals at the Annual Meeting creates such shareholder dissenters' rights.

Any stockholder executing a proxy has the power to revoke such proxy at any time prior to its exercise. A proxy may be revoked prior to exercise by (i) filing with the Company a written revocation of the proxy, (ii) appearing at the Meeting and casting a vote contrary to that indicated on the proxy, or (iii) submitting a duly executed proxy bearing a latter date.

The cost of preparing, printing, assembling and mailing this Proxy Statement and other material furnished to stockholders in connection with the solicitation of proxies will be borne by the Company. In addition to the solicitation of proxies by use of mails, officers, directors, employees and agents of the Company may solicit proxies by written communication, telephone or personal call. Such persons are to receive no special compensation for any solicitation activities. The Company will reimburse banks, brokers and other persons holding common stock in their names, or those of their nominees, for their expenses in forwarding proxy solicitation materials to beneficial owners of common stock.

The Company will appoint one or more inspectors of election to act at the Meeting and report the results. Prior to the Meeting, each inspector will sign an oath to perform his duties in an impartial manner and according to the best of his ability. Inspectors will ascertain the number of shares outstanding and the voting power of each, determine the shares represented at the Meeting and the validity of proxies and ballots, count all votes and ballots, and perform certain other duties as required by law. Inspectors will tabulate the number of votes cast for or withheld in the election of directors, and the number of votes cast for or against all other proposals, including abstentions and other non-votes.

The required quorum necessary to transact business at the Meeting is a majority of the issued common stock outstanding on the record date. If a quorum is present, a plurality of the votes cast for directors will determine the directors elected and the approval of each other proposal at the Meeting. Abstentions and broker non-votes will be counted to determine if a quorum is present but will not otherwise affect the voting on any proposal.

## **INFORMATION ABOUT THE COMPANY**

### **DESCRIPTION OF BUSINESS**

The Company has focused its efforts over the years in acquiring oil and gas properties from other companies, selling producing wells and acquiring new oil and gas leases for the purpose of exploring for oil and gas. Leases have also been acquired over the years for the purpose of reselling them at a profit to other oil and gas companies.

The Company presently does not own any operated properties having disposed of its last operated wells. The Company's production income in oil and gas is derived from properties in which it owns a non-operated working interest, or an overriding royalty interest.

The Company's primary overriding royalty income is from the Hunter Mesa Unit and Grass Mesa Units in Garfield County, Colorado. The Company's overriding royalty interest although less than a half of a percent in both the Hunter Mesa Unit and the Grass Mesa Unit accounts for the majority of the Company's royalty income since the Units contain several hundred wells. An overriding royalty interest is an interest in a well that receives a percentage of the production from a well without paying any operation expenses.

The Company over the last few years has focused most of its exploration efforts in the Rocky Mountain area, and in acquiring leasehold positions in trend areas of existing production. Prior to leasing an area a geological review of the prospective area is made by the Company's staff to determine the potential for oil and gas. If an area is determined to have promise the Company will attempt to acquire oil and gas leases over the prospective area. The Company will then acquire geophysical data (generally seismic and gravity data) to further evaluate the area. After the evaluation of the geophysical data, if the area appears to contain significant accumulations of oil and gas in the Company's opinion for the area, the Company will market a drilling program to outside investors covering the Company's leases or sell the leases with the Company retaining an overriding royalty interest. Significant accumulations cannot be quantified because it depends on many factors such as how much it costs to drill and complete wells in a certain area, how close the wells are to pipelines, what the price of oil or gas is, how accessible the area is, whether the project is a developmental or wildcat project, what the cost of oil and gas leases are in an area, the type of return investors are seeking at that time in the different exploration areas, and many other geological, geophysical and other considerations.

When the Company markets a drilling program it sells its oil and gas leases over the prospect area along with usually retaining an overriding royalty interest in the leases sold. A drilling program will generally allow the Company to recoup its investment in the area with the Company also retaining an ongoing interest in new wells to be drilled in the area.

The Company markets its drilling programs to other industry partners. Drilling programs have been marketed by placing ads in industry journals, attending trade shows and by traveling to the office of prospective partners. In the past, the Company has sold drilling programs to major oil companies and large independents and occasionally to individuals.

The Company was organized on October 16, 1980 under the laws of the State of Utah. The Company's principal place of business is located at 1206 West South Jordan Parkway, Unit B, South Jordan, Utah 84095-5512. The Company's telephone number is (801) 566-3000 and the Company's fax number is (801) 446-5500. The Company has primarily been engaged in the acquisition and exploration of oil and gas properties in Utah, Wyoming, Colorado and Nevada.

### **RECENT DEVELOPMENTS:**

During the last year, the Company has been focusing on obtaining prospects for the exploration of oil and gas and continuing its non-operated wells. The Company has also cut costs dramatically in the last few years because of lower oil and gas prices. During the last fiscal year ended September 30<sup>th</sup>, 2021, and to the present, the Company has engaged in the evaluation of many of its leases and focused on new areas of development.

The Company has also acquired mineral interest in the States of Alaska, Pennsylvania and Wyoming of approximately 18,705.527 net acres with the majority of the acres in Alaska.

## SHARE INFORMATION

As of September 30, 2021, the Company had issued and outstanding 5,096,706 common shares held by approximately 60 holders of record.

There have been no cash dividends declared by the Company since its inception except for the dividend paid of \$.80 per share in November of 2008, to shareholders of record on October 24, 2008. Further, there are no restrictions that would limit the Company's ability to pay dividends on its common equity or that would be likely to do so in the future.

The Company effected a 1-for-2000 reverse stock split in September 2005 and the repurchase of all resulting fractional shares, followed immediately by a 2000-for-1 forward stock split of the Company's common shares ("Stock Splits"). As a result of the Stock Splits, each shareholder owning fewer than 2000 common shares of the Company immediately before the Stock Splits received \$1.50 in cash, without interest, for each of the Company's common shares owned by such shareholder immediately prior to the Stock Splits and is no longer a shareholder of the Company and each shareholder owning 2000 or more common shares immediately before the Stock

Splits received 2000 Common Shares after the Stock Splits in exchange for each lot of 2000 Common Shares held before the Stock Splits. Any additional Common Shares held other than in a 2000 share lot were canceled and exchanged for \$1.50 in cash per share. After the Stock Splits the Company delisted from registration with the Securities and Exchange Commission and the Company now trades on the Pink Sheets ® and is no longer a fully reporting company.

The Company also made a tender offer to all shareholders of record during the Summer of 2012 wherein the Company offered to purchase all shares owned by shareholders other than officers and directors for One Dollar per share. In conjunction with the tender offer and other private party purchases the Company made later, the Company acquired over one million eight hundred thousand shares from the previous year and cancelled the shares thereby reducing the number of issued and outstanding shares of the Company.

On July 1, 2015, the Company announced the retirement of Don J. Colton as President and Treasurer of the Company. The Company's ESOP plan purchased 993,579 common shares in the ESOP from Don J. Colton at One Dollar per share. Purchases by the ESOP are funded from loans by the Company. The Company has also acquired all the shares held by a major shareholder in the Company which consisted of 559,296 shares for a purchase price of seventy-five cents per share. Upon the purchase of these shares they were cancelled by the Company thereby reducing the total issued and outstanding shares of the Company.

Anyone desiring to sell Common Shares is encouraged to contact the Company directly to inquire whether the Company would purchase their shares. Any shares purchased directly by the Company with the shareholder will be without a commission. The Company makes no promise of repurchasing a shareholder's stock at a given time since any decision will be based upon the Company's financial condition and working capital requirements along with the market price of the stock taken into consideration. However, in the past the Company has been acquiring shares offered by shareholders at the current ask price or above.

## **LEGAL PROCEEDINGS.**

The Company may become or is subject to investigations, claims, or lawsuits ensuing out of the conduct of its business, including those related to tax and title issues, environmental safety and health, commercial transactions etc. The Company is currently not aware of any such items, which it believes could have a material adverse affect on its financial position other than the lawsuit filed by Northern Arapaho Tribes of the Wind River Indian Reservation (“Tribes”). In conjunction with the Tribes lawsuit the Bureau of Land Management has an enforcement action against Pioneer Oil and Gas (“Company”) to plug and abandon 10 wells and remediate the oil and gas lease that was effective back in 1999 and terminated between Pioneer Oil and Gas and the Tribes on November 2001. The enforcement action has been affirmed by the State Director of the BLM for the State of Wyoming and presently is being held in abeyance waiting the outcome of the Tribes lawsuit against Pioneer. During the period, the Company held the lease it did not operate the wells on the lease nor did it perform any operations other than some minor cleanup operations that were required for taking the lease.

The Tribes commenced a lawsuit against the Company that is primarily requiring the same obligation as the enforcement action namely that the Company plug and abandon the 10 wells and remediate the lease. The Company contends since it did not drill any wells on the lease nor operate the lease to produce oil and gas during the time it was lessee it should not be liable for past operations that occurred on the lease prior to the time it was the lessee. The Company is also arguing that the statute of limitations bars recovery along with laches (unreasonable delay) and other defenses in contesting the actions. Pioneer Oil and Gas will continue to vigorously fight the Tribes lawsuit with the BLM enforcement action stayed pending the outcome of the Tribal lawsuit. Presently, the Company has filed a Motion to Dismiss the Tribes lawsuit in Tribal Court. The Motion to Dismiss was argued before the Tribal Judge during November 2019 and a ruling was to be made by the Tribal Judge on December 9, 2019, but as of yet no decision has been made.

A final adverse decision regarding this matter against the Company could have a detrimental effect on the financial health of the Company and might require a bankruptcy if the Company is not successful in prevailing on the BLM enforcement action and the lawsuit by the Tribes.

Stockholders of Pioneer Oil and Gas  
South Jordan, Utah

We have audited the accompanying financial statements of Pioneer Oil and Gas (the Company), which comprise the balance sheets as of September 30, 2021 and 2020, and the related statements of operations, stockholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

### **Management's Responsibility for the Financial Statements**

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### **Auditors' Responsibility**

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.

Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

## **Opinion**

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Pioneer Oil and Gas as of September 30, 2021 and 2020, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

## **Report on Supplementary Information**

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplementary information on oil and gas operations is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. PIONEER OIL AND GAS  
NOTES TO FINANCIAL STATEMENTS  
September 30, 2021 and 2020

Note 1 – Organization and Summary of Significant Accounting Policies

Organization

The Company is incorporated under the laws of the State of Utah and is primarily engaged in the business of acquiring, developing, producing, and selling oil and gas properties to companies located in the continental United States.

Concentration of Credit Risk

The Company maintains its cash in bank deposit accounts, which, at times, may exceed federally insured limits. The Company has not experienced any losses in such accounts and believes it is not exposed to any significant credit risk with respect to cash and cash equivalents.

Financial instruments which potentially subject the Company to concentration of credit risk consist primarily of accounts receivable. In the normal course of business, the Company provides credit terms to its customers. Accordingly, the Company performs ongoing credit evaluations of its customers and maintains allowances for possible losses which, when realized, have been within the range of management's expectations.

Cash and Cash Equivalents

For purposes of the statement of cash flows, the Company considers all highly liquid investments with a maturity of three months or less to be cash equivalents.

Investments

Investments are reported in accordance with the provisions of Accounting Standards Update 2016-01 “Financial Instruments-Overall” (Subtopic 825-10), “Recognition and Measurement of Financial Assets and Liabilities”. The adoption of this update requires a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year in which the guidance is adopted (that is, a modified-retrospective approach). That approach requires the amounts reported in accumulated other comprehensive income (loss) for equity securities that exist as of the date of adoption previously classified as available-for-sale to be reclassified to retained earnings. The effect of the adoption of this update resulted in a decrease of retained earnings and an increase in accumulated other comprehensive income of \$0.

*Marketable Equity Securities*

Marketable equity securities are strategic equity investments with readily determinable fair values for which the Company does not have the ability to exercise significant influence. These securities are accounted for at fair value and are classified as investments on the balance sheets. All gains and losses on these investments, realized and unrealized, are recognized in operations.

PIONEER OIL AND GAS  
NOTES TO FINANCIAL STATEMENTS  
September 30, 2021 and 2020

Note 1 – Organization and Summary of Significant Accounting Policies (continued)

Accounts Receivable

Accounts receivable are amounts due on oil and gas sales and are presented net of the allowance for doubtful accounts and are generally unsecured. Accounts receivable are carried at their estimated collectible amounts. Credit is generally extended on a short-term basis; thus accounts receivable do not bear interest although a finance charge may be applied to such receivables that are more than thirty days past due. Accounts receivable are periodically evaluated for collectability based on past credit history with customers. Provisions for losses on accounts receivable are determined based on loss experience, known and inherent risk in the account balance, current economic conditions, and the financial stability of customers.

Resale Leases

The Company capitalizes the costs of acquiring oil and gas leaseholds held for resale, including lease bonuses and any advance rentals required at the time of assignment of the lease to the Company. Advance rentals paid after assignment are charged to expense as carrying costs in the period incurred. Costs of oil and gas leases held for resale are valued at lower of cost or net realizable value and included in current assets since they could be sold within one year, although the holding period of individual leases may be in excess of one year. The cost of oil and gas leases sold is determined on a specific identification basis.

Oil and Gas Producing Activities

The Company utilizes the successful efforts method of accounting for its oil and gas producing activities. Under this method, all costs associated with productive exploratory wells and productive or nonproductive development wells are capitalized while the costs of nonproductive exploratory wells are expensed.

If an exploratory well finds oil and gas reserves, but a determination that such reserves can be classified as proved is not made after one year following completion of drilling, the costs of drilling are charged to operations. Indirect exploratory expenditures, including geophysical costs and annual lease rentals are expensed as incurred. Unproved oil and gas properties that are individually significant are periodically assessed for impairment of value and a loss is recognized at the time of impairment by providing an impairment allowance. Other unproved properties are amortized based on the Company's experience of successful drillings and average holding period. Capitalized costs of producing oil and gas properties, after considering estimated dismantlement and abandonment costs and estimated salvage values, are depreciated and depleted by the units-of-production method. Support equipment and other property and equipment are depreciated over their estimated useful lives.

PIONEER OIL AND GAS  
NOTES TO FINANCIAL STATEMENTS  
September 30, 2021 and 2020

Note 1 – Organization and Summary of Significant Accounting Policies (continued)

Oil and Gas Producing Activities (continued)

On the sale or retirement of a complete unit of a proved property, the cost and related accumulated depreciation, depletion and amortization are eliminated from the property accounts, and the resultant gain or loss is recognized. On the retirement or sale of a partial unit of proved property, the cost is charged to accumulated depreciation, depletion and amortization with a resulting gain or loss recognized in income.

On the sale of an entire interest in an unproved property for cash or cash equivalent, gain or loss on the sale is recognized, taking into consideration the amount of any recorded impairment if the property has been assessed individually. If a partial interest in an unproved property is sold, the amount received is treated as a reduction of the cost of the interest retained.

The continued carrying value of the Company's oil and gas properties depends primarily upon the estimated reserves and the prices it receives for oil and natural gas production. Oil and gas prices historically have been volatile and are likely to continue to be volatile in the future. The Company's production quantities of oil and natural gas are in decline. Any decrease in oil and gas prices without an offsetting increase in reserve quantities could result in an impairment of the Company's assets.

Property and Equipment

Property and equipment are stated at cost less accumulated depreciation. Depreciation is provided using the straight-line method over the estimated useful lives of the assets. Expenditures for maintenance and repairs are expensed when incurred and betterments are capitalized. When assets are sold, retired or otherwise disposed of the applicable costs and accumulated depreciation, depletion and amortization are removed from the accounts, and the resulting gain or loss is reflected in operations.

Long-Lived Assets

The Company evaluates its long-lived assets in accordance with Accounting Standards Codification (ASC) 360. Long-lived assets held and used by the Company are reviewed for impairment whenever events or changes in circumstances indicate that their net book value may not be recoverable. When such factors and circumstances exist, the Company compares the projected undiscounted future cash flows associated with the related asset or group of assets over their estimated useful lives against their respective carrying amounts. Impairment, if any, is based on the excess of the carrying amount over the fair value of those assets and is recorded in the period in which the determination was made. During the years ended September 30, 2021 and 2020, there were no impairments.

Note 1 – Organization and Summary of Significant Accounting Policies (continued)

Revenue from Contracts with Customers

Revenue is recognized in accordance with the provisions of Accounting Standards Update 2014-09 “Revenue from Contracts with Customers” (ASC 606). This accounting standard was adopted by the Company on October 1, 2019 using the permitted modified retrospective approach. The effect of the adoption of ASC 606 was immaterial and as a result no cumulative effect adjustment was made to beginning retained earnings as of October 1, 2019.

Revenue is recognized from oil sales at such time as the oil is delivered to the buyer. Revenue is recognized from gas sales when the gas passes through the pipeline at the well head. Generally, the Company’s contracts have an initial term of one year or longer but continue month to month unless written notification of termination in a specified time period is provided by either party to the contract. The Company has used the practical expedient in ASC 606 which states that the Company is not required to disclose that transaction price allocated to remaining performance obligations if the variable consideration is allocated entirely to a wholly unsatisfied performance obligation. Future volumes are wholly unsatisfied, and disclosure of the transaction price allocated to remaining performance obligation is not required. The Company does not have any gas balancing arrangements.

*Contract Balances*

The Company receives purchaser statements from the majority of its customers. Payment is unconditional upon receipt of the statement or invoice. Accordingly, the Company’s product sales contracts do not give rise to contract assets or liabilities under ASC 606. The majority of the Company’s contract pricing provisions are tied to a market index, with certain adjustments based on, among other factors, whether a well delivers to a gathering or transmission line, quality of the oil or natural gas, and supply and demand conditions. The price of these commodities fluctuates to remain competitive with supply.

*Prior Period Performance Obligations*

The Company records revenue in the month production is delivered to the purchaser. Settlement statements may not be received for 30 to 90 days after the date production is delivered, and therefore the Company is required to estimate the amount of production delivered to the purchaser and the price that will be received for the sale of the product. Differences between the Company’s estimates and the actual amounts received for product sales are generally recorded in the following month that payment is received. Any differences between the Company’s revenue estimates and actual revenue received historically have not been significant. The Company has internal controls in place for its revenue estimation accrual process.

PIONEER OIL AND GAS  
NOTES TO FINANCIAL STATEMENTS  
September 30, 2021 and 2020

Note 1 – Organization and Summary of Significant Accounting Policies (continued)

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the periods reported. Actual results could differ from those estimates.

Significant estimates include volumes of oil and natural gas reserves used in calculating depletion of proved oil and natural gas properties, future net revenues and abandonment obligations, future taxable income and related assets/liabilities, the collectability of outstanding accounts receivable, stock-based compensation expense, and contingencies. Oil and natural gas reserve estimates have numerous inherent uncertainties. The accuracy of any reserve estimate is a function of the quality of available data and of engineering and geological interpretation and judgment. Subsequent drilling results, testing and production may justify revision of such estimates. Accordingly, reserve estimates are often different from the quantities of oil and natural gas that are ultimately recovered. In addition, reserve estimates are vulnerable to changes in wellhead prices of crude oil and natural gas. Such prices have been volatile in the past and can be expected to be volatile in the future.

The significant estimates are based on current assumptions that may be materially affected by changes to future economic conditions such as the market prices received for sales of volumes of oil and natural gas, the creditworthiness of counterparties, interest rates, the market value of the Company's common stock and corresponding volatility and the Company's ability to generate future taxable income. Future changes to these assumptions may affect these significant estimates materially in the near term.

Income Taxes

The Company files Federal and state income tax returns in states in which it operates. Deferred income taxes arise from temporary differences resulting from income and expense items reported for financial accounting and tax purposes in different periods. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. Deferred income taxes are classified as noncurrent. As changes in tax laws or rates are enacted, deferred tax assets and liabilities are adjusted through the provision for income taxes. A valuation allowance is established for any deferred tax asset for which realization is more likely than not.

PIONEER OIL AND GAS  
NOTES TO FINANCIAL STATEMENTS  
September 30, 2021 and 2020

Note 1 – Organization and Summary of Significant Accounting Policies (continued)

Income Taxes (continued)

The Company considers many factors when evaluating and estimating its tax positions and tax benefits. Tax positions are recognized only when it is more likely than not (likelihood of greater than 50%), based on technical merits, that the positions will be sustained upon examination. Reserves are established if it is believed certain positions may be challenged and potentially disallowed. If facts and circumstances change, reserves are adjusted through the provision for income taxes. The Company recognizes interest expense and penalties related to unrecognized tax benefits in the provision for income taxes.

Earnings Per Share

The computation of basic earnings per common share is based on the weighted average number of shares outstanding during each year.

The computation of diluted earnings per common share is based on the weighted average number of shares outstanding during the year plus the common stock equivalents which would arise from the exercise of stock options and warrants outstanding using the treasury stock method and the average market price per share during the year. Common stock equivalents are not included in the diluted earnings per share calculation when their effect is antidilutive. Common stock equivalents that could potentially dilute earnings per share are common stock options.

Stock-Based Compensation

The Company has stock-based employee compensation plans, which are described more fully in Note 14. The Company accounts for stock-based compensation in accordance with ASC 718. ASC 718 requires the Company to recognize compensation cost based on the grant date fair value of options granted. During the years ended September 30, 2021 and 2020 the Company recognized no compensation related to stock.

Presentation of Sales and Similar Taxes

Taxes collected from customers and remitted to governmental authorities are reported on a net basis and thus excluded from revenues.

Reclassification Note

Certain balances in the 2020 financial statements have been reclassified to conform with the presentation in the 2021 financial statements.

PIONEER OIL AND GAS  
NOTES TO FINANCIAL STATEMENTS  
September 30, 2021 and 2020

Note 3 – Investments (continued)

The Company holds investments in equity securities of companies operating in a wide variety of industries. Based upon a review of market and other conditions, the Company believes fair values will recover to equal or exceed the cost basis of the Company's investments. Accordingly, no impairment loss has been recognized.

Realized gains and losses are determined on the basis of specific identification. During the years ended September 30, 2021 and 2020, sales proceeds and gross realized gains and losses consist of the following:

	<u>2021</u>	<u>2020</u>
Sales proceeds	\$ <u>52,246</u>	<u>69,600</u>
Gross realized gains	\$ <u>33,881</u>	<u>-</u>
Gross realized losses	\$ <u>(62)</u>	<u>33,265</u>

Note 4 – Fair Value Measurements

The Company's investments are reported at fair value in the accompanying balance sheets. The methods used to measure fair value may produce an amount that may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the Company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The framework for measuring fair value provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy under ASC 820 are described as follows:

Level 1 – Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Plan has the ability to access.

PIONEER OIL AND GAS  
NOTES TO FINANCIAL STATEMENTS  
September 30, 2021 and 2020

Note 4 – Fair Value Measurements (continued)

Level 2 – Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; inputs that are derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques maximize the use of relevant observable inputs and minimize the use of unobservable inputs. All fair value measurements of the Company's investments are classified within Level 1 of the valuation hierarchy.

In addition to investments, the Company holds certain other financial instruments which may include all current assets and liabilities that could be readily traded. However, none of these instruments are held for trading purposes. The Company estimates that the carrying amount of all current financial instruments approximates fair value due to the short maturity of these items.

Note 5 – Property and Equipment

Property and equipment consists of the following:

	<u>2021</u>	<u>2020</u>
Oil and gas properties (successful efforts method)	\$ 352,592	435,103

Note 7 – Paycheck Protection Program Loans

On May 5, 2020, the Company received a \$30,100 loan from the Paycheck Protection Program (PPP) offered by the U.S. Small Business Administration (SBA). All or a portion of the loan proceeds may be forgiven by the SBA if the loan proceeds are used for specific costs over the eight week or twenty-four-week period following receipt of the loan proceeds. On November 30, 2020, the Company received confirmation from the SBA that all of the original loan amount was forgiven. The loan amount is shown as a gain on forgiveness of paycheck protection program loan in the statement of operations.

On March 1, 2021, the Company received a \$30,117 loan from the PPP offered by the SBA. On November 4, 2021, the Company received confirmation from the SBA that all of the original loan amount was forgiven. The loan amount is shown as a gain on forgiveness of paycheck protection program loan in the statement of operations.

Note 8 – Stock Subscription Receivable

The stock subscription receivable consists of a one percent receivable due from the Company's employee stock ownership plan (ESOP). The receivable is reduced every six months by the amount of the obligation owed by the Company to the ESOP, less interest (see Note 15). During the years ended September 30, 2021 and 2020, the Company recognized \$713 and \$866 of interest income related to this note.

The proceeds of the note were used by the ESOP to acquire 993,579 ESOP shares held by an owner of the Company. As of September 30, 2021 and 2020, the balance owed the Company by the ESOP, including accrued interest, was \$1,054,663 and \$1,044,221, respectively. During the years ended September 30, 2021 and 2020, the Company recognized \$10,442 and \$10,339 of interest income related to this note.

Note 10 – Income Taxes (continued)

As of September 30, 2021, the Company has federal net operating loss (NOL) carryforwards of approximately \$4,535,000 that begin to expire in 2031. If substantial changes in the Company's ownership should occur there would be an annual limitation of the amount of NOL carryforwards which could be utilized. Also, the ultimate realization of these carryforwards is due, in part, on the tax law in effect at the time, and future events, which cannot be determined.

Note 11 – Sales to Major Customers

The Company had oil and gas revenues to major customers during the years ended September 30, 2021 and 2020, which exceeded ten percent of total oil and gas revenues as follows:

	<u>2021</u>	<u>2020</u>
Company A	\$ 140,665	91,865
Company B	\$ N/A	72,000
Company C	\$ 43,765	N/A

Note 12 – Related Party Transactions

The Company disburses revenue for several oil and gas properties in which employees, officers and other related and unrelated parties have a working or royalty interest. At September 30, 2021 and 2020 there were no related party balances included in accounts payable due to officers as a result of these activities. The Company also is a member in certain limited partnerships and the operator for certain joint ventures formed for the purpose of oil and gas exploration and development.

The Company leases its office space from certain officers of the Company on a month-to-month basis. The lease requires monthly rental payments of \$1,700 plus all expenses pertaining to the office space. Rent expense for the years ended September 30, 2021 and 2020 was approximately \$22,000 and \$22,000, respectively.

The Company has a stock subscription receivable and a note receivable from the ESOP (see Notes 8 and 9, respectively).

Note 14 – Stock Options

Under the Plan, the Company may issue shares of the Company's common stock or grant options to acquire the Company's common stock from time to time to employees, directors, officers, consultants or advisors of the Company on the terms and conditions set forth in the Plan. No activity has occurred during the last two years and there are no common stock options outstanding as of September 30, 2021.

Note 15 – Employee Stock Ownership Plan

The Company has adopted a noncontributory employee stock ownership plan (ESOP) covering all full-time employees who have met certain service requirements. It provides for discretionary contributions by the Company as determined annually by the Board of Directors, up to the maximum amount permitted under the Internal Revenue Code. The plan has received IRS approval under Section 401(A) and 501(A) of the Internal Revenue Code. Pension expense charged to operations for the years ended September 30, 2021 and 2020 was \$16,162 and \$16,162, respectively. The amount contributed by the Company to the defined contribution plan for the year ended September 30, 2021 and 2020 was approximately \$0 and \$13,000, respectively.

PIONEER OIL AND GAS  
NOTES TO FINANCIAL STATEMENTS  
September 30, 2021 and 2020

Note 17 – Commitments and Contingencies

Limited Partnerships

The Company has an immaterial interest in a limited partnership drilling program and acts as the general partner. As the general partner, the Company is contingently liable for any obligations of the partnership and may be contingently liable for claims generally incidental to the conduct of its business as general partner. As of September 30, 2021, the Company is unaware of any such obligations or claims arising from this partnership.

Employment Agreements

The Company has entered into severance pay agreements with employees and officers of the Company who also serve as board members. Under the terms of the agreements, a board member who is terminated shall receive severance pay equal to the amount such board member received in salary and bonus for the two years prior to termination.

Litigation

The Company has had a lawsuit filed against it by the Northern Arapaho Tribes (the Tribe) asking the Company to plug and abandon 10 wells and remediate the respective oil and gas leases previously held by the Company but terminated in 2001. In addition, the Bureau of Land Management has initiated an enforcement action related to this matter. The Company did not drill or operate any wells during the time it was lessee of the properties and is contending that it should not be held liable for past operations that occurred prior to the time it was lessee, and that the statute of limitations has passed. The Company plans to continue to vigorously argue both actions and has requested a stay from the enforcement action while awaiting the outcome of the lawsuit with the Tribe. An estimate of any potential liability associated with this lawsuit and enforcement action cannot be reasonably determined.

The Company has a lawsuit filed against it by XTO asking the Company to plug and abandon a well located in Rio Blanco County, Colorado. The Company sold its interest in the well in question that eventually filed for bankruptcy. The Company asserts that it is not liable for the costs associated with plugging and abandoning the well and will continue to vigorously defend itself against this lawsuit. An estimate of any potential liability associated with this lawsuit cannot be reasonably determined.

The Company may also become or is subject to investigations, claims or lawsuits ensuing out of the conduct of its business, including those related to environmental safety and health, commercial transactions, etc.

PIONEER OIL AND GAS  
NOTES TO FINANCIAL STATEMENTS  
September 30, 2021 and 2020

Note 18 – Risks and Uncertainties

The Company's oil and gas reserves are continually declining, which will eventually result in a reduction of the amount of oil and gas produced, oil and gas revenues, and cash flows. The Company has historically replaced reserves through both drilling and acquisitions, however, there is no assurance that oil and gas reserves can be located through drilling or acquisition or that even if reserves are located, that such reserves will allow the recovery of all or part of the investment made by the Company to obtain these reserves.

The Company's carrying cost of its oil and gas properties are subject to possible future impairment based on the estimated future cash flows of these properties. These estimated future cash flows are in turn subject to oil and gas prices that are subject to fluctuations and, as a consequence, no assurance can be given that oil and gas prices will decrease, increase or remain stable.

Note 19 – Subsequent Events

The Company evaluated its September 30, 2021 financial statements for subsequent events through January 6, 2022, the date the financial statements were available to be issued. The Company is not aware of any subsequent events which would require recognition or disclosure in the financial statements.
